LIFT SCREENMAT

approved by **Genie**

The Lift Screenmat gives workers a comfortable, ergonomic working surface. The Lift Screenmat is made up of two layers of durable closed cell foam with a layer of high strength mesh in between. The mesh barrier catches all small objects, preventing them from falling through the basket and causing a safety hazard or equipment damage below.

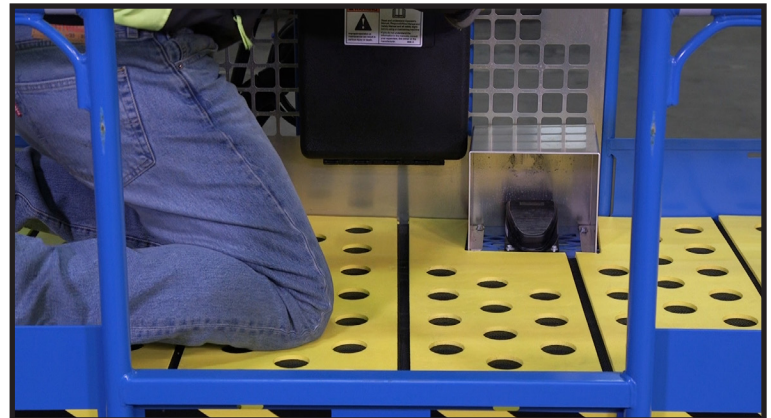

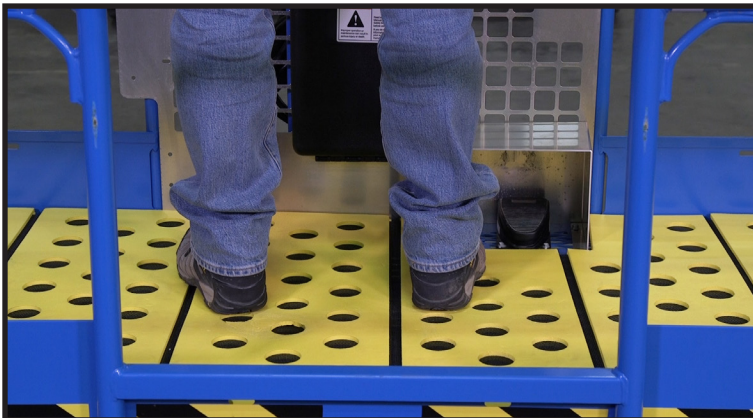

The durable closed cell foam and the high strength mesh can withstand the force of workers stepping or standing on materials caught by the Lift Screenmat. If the foam becomes indented or cut the closed cell structure maintains its integrity.

The mesh filled holes in the Lift Screenmat allow workers to see beneath the lift basket. This makes raising and lowering the basket safer.

The cushioning of the Lift Screenmat helps workers be more productive by reducing fatigue and increased strain on the body.

For wholesale orders and more information call **Genie** (877) 367-5606 or visit gogenielift.com

For retail orders and more information call Cranetainer System US (425) 415-6767 or visit www.cranetainersystem.com

Part Number - LSMB8GNE21 (Fits **Genie** 8' Basket)
